### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 7-11, 13-14 are rejected under 35 U.S.C. 102(e) as being anticipated by Yokoyama (6,547,400).

Yokoyama discloses a projection arrangement wherein a plurality of LED's arranged on a substrate (wafer) (Column 7 Line 8) for producing lights of at least two colors. Figure 13 illustrates the arrangement of the LED's. Each set of R, G, B

Art Unit: 2851

is interpreted as a "group". As noted in the description of the LED's may be illuminated such that each individual color diode group (subset) as a whole is sequentially illuminated, thus producing parallel "bars" of light. The different colors are deemed to be "flashed" as the limitation is commonly defined.

See figure 13

***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claim 12 is rejected under 35 U.S.C. 103(a) as being unpatentable over Yokoyama.

Yokoyama does not specify the claimed method of formation of the LED array.

As best as the formation of the LED's on multiple substrates can be understood from the skeletal description in the specification, it would have been obvious to one of ordinary skill in the art at the time of the invention to form an LED array by a variety of methods including single and plural

"substrate" bases because such is well within the level of ordinary skill of conventional electronics.

***Allowable Subject Matter***

3. Claims 1-3, 5-6, 17-22 are allowed.

4. The following is a statement of reasons for the indication of allowable subject matter: The prior art of record fails to disclose a light source comprised of a plurality of light emitting diodes selectively activated to form at least two light bars which are scrolled by sequential activation of the diodes forming the bars.
